

SAHMRI & AUSTRALIAN BRAGG CENTRE
FOR PROTON THERAPY AND RESEARCH
WEBINAR SERIES

How can we improve the radiation experience for patients & families?

Join the conversation as we prepare to welcome the introduction of proton therapy to Australia and hear from renowned international and national speakers involved in radiation oncology system and infrastructure design. The Australian Bragg Centre for Proton Therapy and Research is a highly anticipated centre, and when opened will deliver precise and technologically advanced radiation therapy to Australian cancer patients.

Speakers include clinicians from The Christie NHS Foundation Trust, The Danish Centre for Particle Therapy, Princess Alexandra Hospital, Peter MacCallum Cancer Centre, The Royal Adelaide Hospital and specialists in architecture and interiors from the global architecture studio Woods Bagot. They along with patients and families and representatives from non-government organisations will share their thoughts and reflections on system and infrastructure design that helps to improve the patient experience.

WEDNESDAY
18 & 25 NOVEMBER 2020
12:30PM-2:00PM (AEDT)
